

PSE project update

Green Lake-area natural gas main replacement project

July 10, 2019

Dear Neighbor,

Puget Sound Energy has been working in your neighborhood for the last four months to replace the existing natural gas main with new, corrosion-resistant plastic pipe. To date, we have replaced 4,500 feet of gas main. This is a courtesy letter to provide you with an update on our progress and the expected timeline for the remainder of the project.

Natural gas main project update

Natural gas crews from PSE and InfraSource continue their work to replace the underground natural gas main and some individual service lines. Construction began in March 2019 and is on track for completion by early fall 2019. Work hours are Monday through Friday, 9 a.m. to 3 p.m.

We've completed gas work along Northeast 80th Street and intersecting streets, between 1st Avenue Northeast and Wallingford Avenue North. Remaining gas work will occur along East Green Lake Drive North and intersecting streets, between Wallingford Avenue North and Corliss Avenue North, Seattle (please see map on reverse).

While the gas work is ongoing, you can expect:

- Impacts to normal traffic conditions, including reduced lanes, detours and short wait times while crews use steel plates to allow vehicles to pass through the work area. Signs and traffic control flaggers will guide vehicles and pedestrians safely through the work areas.
- Curbside parking will be impacted. "No parking" signs will be placed ahead of time in the work area.
- Crews will maintain access to driveways wherever possible, in coordination with impacted neighbors.
- Typical construction noise from excavation, trucks and heavy machinery. Crews will abide by all city noise ordinances.
- **As part of this work, some customers will have the gas service line to their home or business replaced, requiring a short interruption of natural gas service.** We'll provide affected customers with more information in advance of the service line work occurring on their property.

Road and sidewalk restoration

A contractor crew from **AA Asphalt Inc.** will begin temporary restoration work along North 80th Street in mid-July. The Seattle Department of Transportation (SDOT) will complete the final road restoration along North 80th Street as part of their Green Lake and Wallingford Paving and Multi-Modal Improvements project. Learn more about SDOT's project here: www.seattle.gov/transportation/greenlakepaving.htm.

Following N 80th Street, AA Asphalt, Inc. will work to complete the final restoration work on all side streets intersecting N 80th Street. Please refer to the map on the reverse for restoration work locations and anticipated timelines.
