

Comprehensive Small Industrial Incentives

Earn incentives for small industrial equipment retrofits

Our Comprehensive Small Industrial (CSI) Incentives offer smaller industrial customers the opportunity to expand energy savings beyond a typical equipment retrofit. CSI offers incentives for energy-efficient capital improvement projects and low to no cost operational and maintenance (O&M) changes.

What you get

Our CSI incentives apply to non-lighting energy-efficient capital improvements combined with O&M changes or standalone O&M changes at your facility. If you qualify for a CSI incentive, you'll receive:

A site visit to identify potential opportunities for both capital and O&M savings to achieve the CSI incentives.

You have 2 options:

(1) CSI Incentive – Capital Improvement and O&M Changes: An incentive for your small industrial retrofit project, including incentives for the equipment upgrade and any additional O&M changes that yield energy savings. The total incentive can cover up to 70% of eligible project costs, which can include equipment and installation. Current incentive rates are listed below.

- Up to \$0.45 per kWh saved
- Up to \$8 per therm saved
- Up to 70% of eligible project costs

(2) CSI Incentive – O&M Changes Only: An incentive for solely O&M changes that yield energy savings. The total incentive can cover up to 100% of eligible project costs. Current incentive rates are listed below.

- Up to \$0.10 per kWh saved
- Up to \$1 per therm saved
- Up to 100% of eligible project costs

Use the QR code below for more details about our Custom Retrofit Grant incentives.

How you qualify

To be eligible for a CSI Incentive:

- You must currently be a PSE business electric or gas customer.
- Your business site must be considered industrial, which often (but not always) means either: the majority of its electric load is associated with processing or manufacturing; or, its subsystems maintain long run-hours, rely on industry-standard technology, and keep relatively stable control set points and loads.
- Sites whose principal use is office or retail are almost always not eligible for this program.
- Your business site must use less than 1,000,000 kWh of electricity per year and less than 50,000 therms of gas per year.
- You must be pre-approved by PSE prior to the installation of all energy-efficiency improvement measures.

How you apply

Use the QR code below for instructions on how to apply. If you have questions, get in touch with us at industrialem@pse.com.

Energy-efficiency programs like Comprehensive Small Industrial Incentives support PSE's vision to reduce carbon emissions and create a cleaner energy future for all. Learn more at pse.com/TOGETHER.
